## The Penkovsky secrets

CPYRGHT

One of the most extraordinary feats of espionage in this century was achieved by Oleg Penkovsky, the Soviet colonel brought to trial in Moscow two years ago. He was charged with spying for the West, in association with Greville Wynne, and was sentenced to death for treason.

The full extent of Colonel Penkovsky's work for the West is only made clear now—in a remarkable document to be published next month by Collins, called "The Penkovsky Papers." THE OBSERVER has secured newspaper publication rights of this controversial story, and will publish the first extract next Sunday.
